And the intuitive, drag and drop . Exhibition in Maastricht (NL), where CAST was also represented R36 has a totally new look with interactive and responsive interface. Three new Color modes allow to use a color scheme or a preset of the R36 user interface, all at once to match different design and content requirements. And with the help of a new CV-implemented system, you can create settings that are optimal for all stakeholders, including designers, artists, and even the costumer. A new look and new colors for R36 R36 now comes with a dedicated new Smart Viewer, a browser which brings an improved live preview and a new dynamic image view for a consistent display of image content. It allows you to access any object in the scene, including all the components and textures, and to move around with just a click. R36's new Smart Viewer The new look is complemented by a . And R36 was awarded a top prize at the Maastricht Lighting Symposium, and the titles of (dual) Product of the Year and (dual) Best Collaborative Product. R36 is also the winner of the Design World Awards in the category: Best Lighting Design and Best Previsualization . About CAST Software B.V. [www.cast-software.com][] Q: How to translate the image with a gradient to another one I need to translate the image above with the gradient and have another like this. But I dont know how to achieve this. A: Here's the image, and a rough draft of how to do it with photoshop. Obviously this isn't the way to go, it was just to give you an idea. Once you have the gradient, duplicate the image, move the top layer to the left hand side, and then layer mask. Then, cut the copy out of the duplicate layer. Finally, 82157476af
